MCA10 SEMI-AUTOMATIC CAN HANDLE APPLICATOR

Semi-Automatic Handle Applicator applies HDPE Handles at Speeds up to 10 Cycles Per Minute

Roberts PolyPro's MCA10 semi-automatic can handle applicator is designed to apply HDPE handles to four and six packs of beer at speeds of up to 10 cycles per minute. The new semi-automatic applicator is easy to use, is portable and has a small footprint that makes it perfect for space constrained environments. Compatible with 12- and 16-ounce cans, the MCA10 is ideal for breweries and mobile canning companies.

FEATURES AND BENEFITS

- **Packaging Rates** – Applies handles at a rate of up to 10 cycles per minute with 14 minutes between replenishing handles
- **American Made** – Designed and built in Charlotte, NC
- **Small Footprint** – Ideal for space constrained environments
- **Portable** – Easily rolls out of the way when not in use
- **Simple** – Easy to use operation ensures minimal training
- **Flexible** – Applies HDPE handles to 12- and 16-ounce cans, no change parts required
- **Sustainable** – Roberts PolyPro's 100% recyclable HDPE handles are made with 30% less plastic than old style handles
