CAN MULTIPACK HANDLES

Injection Molded Can Multipack Handles: 100% Recyclable And Up To 30% Less Plastic

Sustainability is important to craft brewers and it has long been a core part of the culture at Roberts PolyPro. Our can handles are 100% recyclable and use up to 30% less plastic than competitive style handles. The HDPE #2 handles feature an open top design so no moisture accumulates between the can top and handle eliminating the ick factor in taste or odor. Each can ring on a four or six pack has two tabs to give the person lifting the ring off the top a comfortable "lift tab." The tabs also make the rings fast and easy to apply at the brewery, either manually or via semi-automatic or automatic applicator. These eye-catching handles are available in any PMS color.

Brewers love the way the handle colors and tab design draw the eyes of consumers. It is a fresh look that differentiates the pack.

The HDPE #2 handles feature an open top design so no moisture accumulates between the can top and handle eliminating the ick factor in taste or odor.

FEATURES AND BENEFITS

- Ability to remove cans without excessive force
- Engineered for comfort with superior holding capabilities
- Up to 30% lighter than competitive injection molded handles
- Contoured profiles complement premium packages
- Easily applied using Roberts PolyPro handle applicators
